

FREE 'CANCER AND GENOMICS' WEBINAR FOR THOSE DIAGNOSED WITH CHALLENGING CANCERS, LOVED ONES AND CARERS

Omico, the national not-for-profit organisation changing the way we fight cancer through precision oncology, comprehensive genomic profiling (CGP) and treatment matching, is hosting a free educational webinar in February.

This webinar will provide a deep dive into the area of cancer and genomics with a team of experts and people who have received CGP and a treatment matched to their specific cancer. It aims to provide a greater understanding of precision oncology and CGP – what it is, what it involves and why it matters.

Details:

This webinar builds on feedback received from the community and explores both the fundamentals of precision oncology and CGP, but also extends to other important topics. It will cover:

- The role of precision oncology and CGP within a contemporary cancer management plan.
- The importance of the patient and doctor partnership considering and harnessing CGP and matching to targeted medicines.
- An insight into modern-day clinical trials with precision oncology – how matching to treatment occurs and what participation on a clinical trial involves.

Who Should Attend?

Anyone (16 years and over) diagnosed with advanced, incurable or an earlier diagnosis of poor prognosis cancers – family members, carers, or loved ones.

The diagnosis can be any solid tumour cancer type for example breast, lung, prostate, bowel, skin or rare cancer.

Why Attend?

- To gain an understanding of CGP – who it's for, what it can offer and what it involves?
- To hear how CGP can be discussed with your cancer doctor/oncology team as part of your cancer management plan.
- To understand more about modern-day clinical trials – why they are important and what they involve?
- To hear from those who have experienced CGP firsthand.
- To have the opportunity to ask questions to a panel of experts.

We look forward to seeing you online!

**THURSDAY,
6TH FEBRUARY 2025**

1.00 – 2.15PM AEST

Presenters:

A/Prof Mandy Ballinger
PhD, Head of Cohorts
for Omico

Dr Gregory Gaughran
Medical Oncologist,
Geelong/Box Hill,
Melbourne

Prof Lorraine Chantrill
Medical Co-Director
ISLHD Cancer Services

Also presenting will be people living with cancer who have received CGP and treatment matching.

Expert Panel Q&A

There will also be the opportunity to ask questions to the presenters and also:

Prof David Thomas
Chief Science and
Strategy Officer
Omico

Meredith Cummings
Oncology Nurse,
CEO, Neuroendocrine
Cancer Australia.
